COVID-19's Impact on Communities of Color Already Suffering from Health Inequity

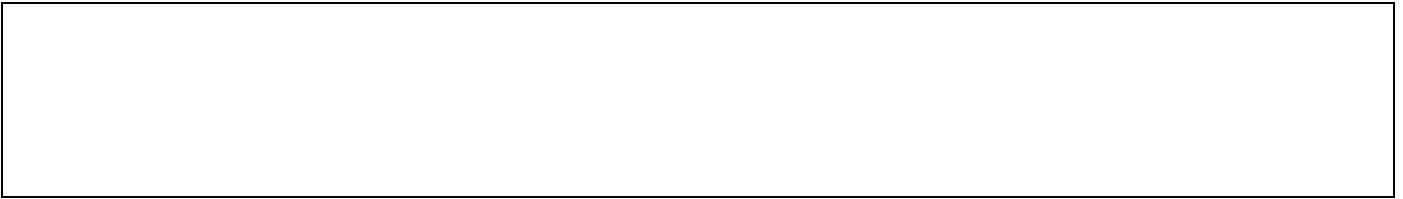

Use the Day 1 resources provided to answer the following questions.

***Answer each question in the boxes provided using complete sentences.**

1. As shown in the figure above, what issues learned during last week's lesson are contributing to the high number of deaths in Latinx and Black communities?

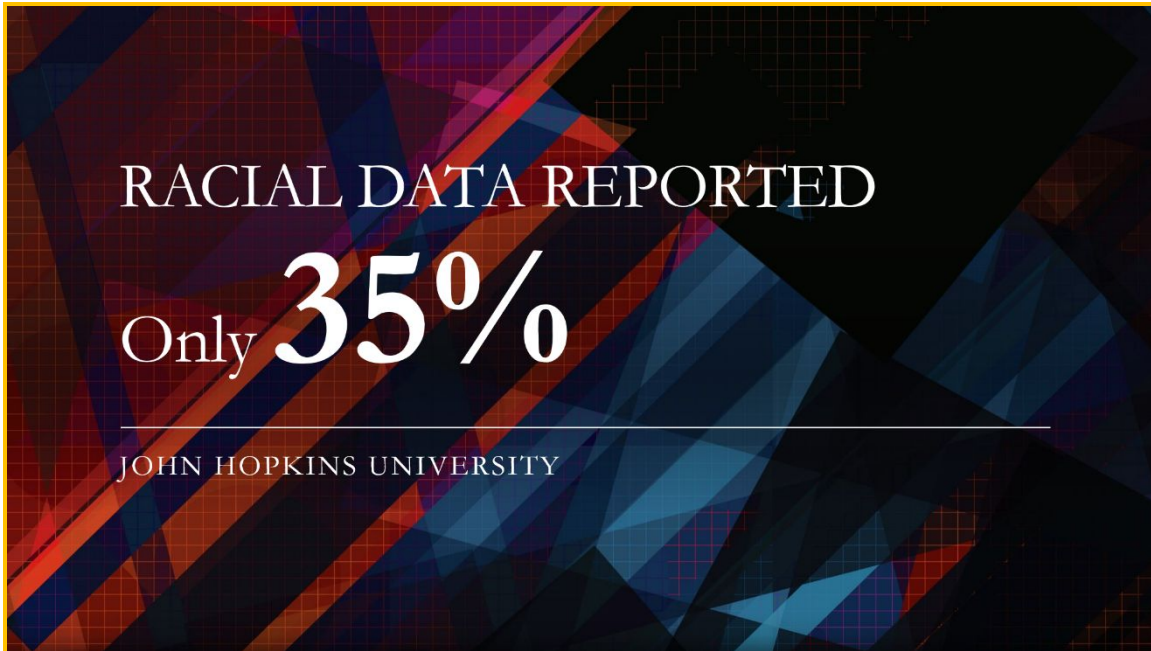

2. In the assigned article, *Latinos Dying Due to COVID-19*, public health experts express concerns about the data reported in the Latinx community. What are the challenges in collecting this data, and why are some of these challenges unique to Latinx communities?

3. As COVID-19 forces employees in various fields to social distance and remain home, why does this create additional problems for people of color, and what are the potential health consequences for those unable to social distance?

4. The article *Hampden County and COVID-19* identifies what some call “micro-pandemics.” What is meant by this term, and how do these “micro-pandemics” create further disparities in Springfield and Hampden County?

5. The assigned article, *Latinos Dying Due to COVID-19*, describes mistrust in the government as a major factor preventing many Latinx people from seeking medical treatment. According to the article, why does that mistrust exist, and how can it be addressed?

6. Based on this week's video and articles, summarize how COVID-19 has impacted vulnerable Black and Latinx communities and the threat it poses as the pandemic continues. Finally, what can be done to address the inequities that exist?
